DETAILED ACTION

Inventorship

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,3,5 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Atsushi (JP 2002-054474). Atsushi discloses in processing of step S220, when it is judged that need torque is from a value y1 before a value y2, by reference of a torque map, the condition of a car is in the required condition of torque assistance. The control

Art Unit: 3747

apparatus 70 of the hybrid vehicle operates the engine under the partial cylinder deactivation operation and controls the motor output for compensating the difference between the total required output of the power source and the engine output under the partial cylinder deactivation operation. See Figs. 10 and 11; S220; S240; S250; S260; S270.

Allowable Subject Matter

Claims 2 and 4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The reference by Bhavsar et al (US 6,691,807) discloses motor and engine are each coupled to drive train of vehicle.
